1 Motivation

This project aims providing a platform for users to learn and improve their non-native languages via socializing with other people. It is a profile based platform which enables users to create their profiles and get matched to a language learning event. This platform provides not only a pure learning activity but also getting socialized via meet-ups of users in created events.

2 Functionality

2.1 Creating a Profile

2.1.1 Qualification Aspect

2.1.2 Lecturing Languages In Native

2.1.3 Learning Languages

2.2 Type of Lecturing Method

2.3 Type of Learning Method

2.4 Creating an Event

2.4.1 Confirmation System

2.5 Event Notification System

2.5.1 Guided Concrete Notification for User

2.5.2 Guided Ghost Notification for User

2.6 Review System

2.6.1 Commenting System

2.6.2 Ranking System

3 Development Infrastructure

3.1 Programming Languages

3.2 Integrated Development Environment

3.3 Testing Infrastructure

4 Architectural Infrastructure

4.1 Data Base System

4.2 Web Server

5 Maintainability
